

## ADVANTAGES

- Microfine glass media with thermoplastic resin separators formed into a single mini-pleat filter pack.
- 95% at 0.3 $\mu$  to 99.99995% at most penetrating particle size (MPPS).
- Available in 53mm, 70mm or 100mm pack depths.
- Available with gasket, knife-edge, or gel channel for sealing to mounting hardware.

| <b>Application</b>                     | Pharmaceutical and semiconductor manufacturing facilities, medical facilities and other clean process applications |
| <b>Frame</b>                           | Anodized aluminium   |
| <b>Gasket</b>                          | Available on demand  |
| <b>Media</b>                           | Glass fiber  |
| <b>Separator</b>                       | Hot-melt Separator Technology  |
| <b>Sealant</b>                         | Polyurethane   |
| <b>Recommended final pressure drop</b> | 2x Initial pressure drop   |
| <b>Max Temperature (°C)</b>            | 71° C, 160° F  |
| <b>Comment</b>                         | Tested in accordance with IEST Recommended Practice for Testing HEPA Filters. UL 900.                              |
